-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1616

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 4, 10-13, 15-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grabowski et al.

Zettler et al teach solid dosage forms comprising a drug made by extrusion (abstract). Polyvinylpyrrolidone is disclosed as a binder (column 3 line 48). Triglycerides are specified (column 4 lines 44-47). Estradiol and ethinylestradiol is disclosed (column 6 line 2). 0.1-95% active is specified (column 5 lines 25-26).

The examiner takes notice under MPEP 2144.03 that the above cited actives are estrogens.

It would have been obvious to one of ordinary skill to use estradiol or ethinylestradiol in the composition of Zeitler et al to achieve the beneficial effect of an agent with estrogenic activity. As to the claimed extrusion without heat input, Zettler et al teach that heating can be done outside the extruder (column 3 lines 9-12).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 1616

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4, 6, 13, 16-18, 20-23 rejected under 35 U.S.C. 102(e) as being anticipated by Meignant.

Meignant teaches a composition comprising estradiol, polyethylene glycol and solid triglycerides (column 6 lines 15-20).

Claims 13, 16, 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 13 "pharmaceutically compatible adjuvant or additive" is indefinite. Claim 1 already specifies both additives and adjuvants which are pharmaceutically compatible. In claim 16 "low-dose" is vague; it is subjective. In claim 20 "obtainable" is vague; is it unclear as to whether what follows is definitely claimed.

No claims allowed. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Webman whose telephone number is 571-272-0633. The examiner can normally be reached on M-F from 8 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, G. Kunz, can be reached on 571-272-0887. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
